

Ten Oaks

Natural Collection

Prefinished Natural Red Oak

Available with our Six Side Seal:

Protect your investment with our patented moisture barrier that completely wraps each piece of flooring. Reduce the likelihood of warping, cupping, and cracking due to seasonal moisture changes. Minimize and isolate damages to your floor from accidental under-floor water leaks. Protect your floor from wood-eating insects by providing a physical barrier around your flooring. Enhance the color and character inspection of each piece of flooring before laying the wood in your home.

On the jobsite, sand and finish your floor just like you would a normal strip floor.

Pallet Weight (lbs):	1984	1931
Pallet footage (sf):	684	665
Moisture Content. (%):	6-8	6-8

Select & Better

Select & Better provides a natural backdrop for any and all decorating; it is exquisite in formal rooms, yet comfortable in less formal ones. One can expect gentle color variations, a few thin mineral streaks, delicate burls, and similar character which are interspersed occasionally, accenting the varying grain pattern.

#1 Common

#1 Common connect with casual decors (as might be found in family rooms, kitchens, and bedrooms). Rich color variations enhance its warmth, while interesting and inviting character such as mineral streaks, ideal small knots, and small arrays of wormholes, punctuate the floor with nature's varied beauty.

#2 Common

#2 Common is beautiful and rustic with a robust character. The broad spectrum of deep, rich color variations provide the perfect canvas for mineral streaks, knots, and wormholes. Fit for a cabin, "man cave," or that rustic room with a fireplace, #2 Common brings the rugged beauty of nature indoors.

Environmental Commitment: Ten Oaks is committed to the environment. See our sustainability efforts on our website at www.tenoaksflooring.com.
